- **Weekly Summary (Short summary about what you did this week)**
  From this week, our group began to make Cybeacon app. Every member discussed about the plan of the semester, and we decided the timeline as follow:
  - Ming will finish the User Interface design, android client to UI communication, and page activity building in first two weeks.
  - During the next two weeks, Chenliang will start to make the database; meanwhile, Sam will start to test for data transmission and iBeacon distance and he will also write a code that scans for Bluetooth device.
  - After that Xin Ying and Xiayang will work on the automatic silencing function of the app in two weeks.
  - Once the first function is finished, Xin Ying and Xiayang will then work on the broadcasting function, which will also be finished in two weeks.
  - After the functions are finished, we will spend some time debugging and testing for functions.
  - Then, Ming will update the login page for professors to upload lecture notes and sending announcements.
